

Project Update

On behalf of the project team, we hope that you had a fun and safe summer season. The team has been hard at work through the hot summer months to make great strides in construction of the Grand Parkway Infrastructure project. As you know, Tropical Depression Imelda passed through the region in mid-September. Our thoughts are with those who were impacted by this storm. Upon the conclusion of Tropical Depression Imelda, the crews worked tirelessly to ensure that the aftermath of the storm minimized the impact on the project. Below, you will find the latest updates and news about the project.

Segment H

New Caney to FM 1413 Dayton

Segment H continues to make great progress with constructing bridges, land clearance, grading and sub-grade preparation for the new pavement. Pictured here is a crew preparing for a concrete pour associated with the bridge columns that are being constructed adjacent to Loop 494 near the New Caney High School. Concrete beams spanning over IH-59 / IH-69 are scheduled to be placed over the coming months.

Segment I-1

FM 1413 in Dayton to SH-146 in Mont Belvieu

The team in Segment I-1 is currently working on a number of frontage roads, bridges, and grading for the main lanes. Pictured is an aerial view of where the frontage roads and main lanes will be constructed within Liberty County. While much of the construction activity may not be seen, crews will be mobilizing shortly to the areas of FM 686 and CR 621. At these locations, the team will begin constructing bridges over the coming months.

Segment I-2

SH-146 in Mont Belvieu to SH-99 in Baytown

Crews continue to work on the frontage roads and bridges in segment I-2. Over the coming weeks and months, the team will be focusing on:

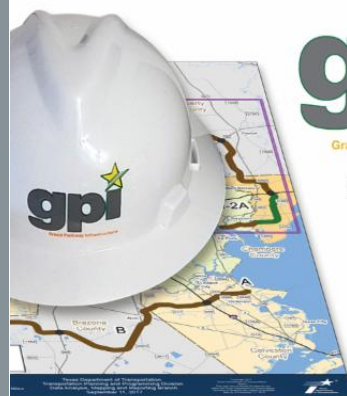

- Installation of drainage structures along SH-146 and SH-99.
- Removal of the lift bridge in Baytown on the Cedar Bayou is scheduled for mid-November 2019, weather permitting. During this time, there will be no access to through traffic on the bayou at the lift bridge location.(photo)
- Drilling shafts, pouring caps, and setting beams for the bridge that will be constructed over IH-10.

Introducing Chris Neil.....

Grand Parkway Infrastructure would like to welcome Chris Neil. He joins us as the new Public Relations Manager for the Grand Parkway Infrastructure project, segments H, I-1, and I-2. Please do not hesitate to reach out to Chris with any questions about the project, or if you'd like to setup a meet and greet. He is excited to get involved in the local communities impacted by the project and be a liaison for construction updates.
