

SH-99 Grand Parkway Update

Over the past few months, our crews have made great progress in all segments within the project scope. With the spring time weather now here, we are looking forward to taking advantage of the weather conditions and day light, to achieve some exciting milestones. Below you will find construction updates on segments H, I-1, and I-2. With the team expected to perform bridge construction over IH-59/69 and IH-10 over the coming months, please consider encouraging family, friends, and co-workers to [sign up](#) to receive traffic alerts from the Grand Parkway Infrastructure team.

Segment H Update

Major activities within Segment H include:

- Installing columns in the Peach Creek area
- Continuation of bridge work over Loop 494 near New Caney ISD. Some activities may require road closures.
- Preparation and bridge construction over IH-59/69. This work is tentatively scheduled to take place over the coming weeks and will require periodic road closures. **(photo)**
- Frontage road construction along FM 1485

Segment I-1 Update

Major activities within Segment I-1 include:

- Crews recently mobilized to FM 1960 in Dayton to begin work in the area, including the construction of bridge columns. Activity where SH-99 will cross FM 1960 will continue to increase over the coming months. **(photo)**
- Continuation of bridge construction over FM 1413. Some activities may require periodic road closures for crews to perform their work safely.
- The team has also mobilized to US-90 over the past few weeks to begin preparation for bridge work in the area. Lane reductions near this crossing are in place.

Segment I-2 Update

Major activities within Segment I-2 include:

- Construction of FM 1405 bridge **(photo)**
- Frontage road construction on B146 in Baytown. This summer, traffic in the area will be switched to the frontage roads while crews begin construction of the SH-99 main lanes.
- Preparation for bridge construction over IH-10. This work, which will impact traffic, is tentatively scheduled to take place within the next few months.
- Traffic modifications will take place on 146B near Goose Lake and Bayland Marina. The modifications are needed to allow for crews to work on SH-99 main lanes, frontage roads, utilities, and bridges.

TRAFFIC IMPACTS & NEWS

All traffic impacts associated with the Grand Parkway project are updated on a weekly basis on the [project website](#). Significant traffic impacts will be posted on [Facebook](#) and [Twitter](#). To receive traffic alerts and updates via email, subscribe [here](#).
